Wiring Diagram

Connecting LED lights:

PX1205-OLED is equipped with 2 types DMX terminals for users' selection, The following diagram takes RJ45 as an example, same connecting method for Green terminal.

An amplifier is needed when more than 32 decoders are connected, signal amplification should not be more than 5 times continuously.

If the recoil effect occurs because of longer signal line or bad line quality, please try to connect 0.25W 90-120Ω terminal resistor at the end of each line.
